WALK-IN COOLERS AND FREEZERS

The First. The Best.

It Started With a Fish Story

A hundred years ago, W.A. Brown was the owner of a fish market. Necessity being the mother of invention, his company became a pioneer in refrigeration, leading the way in innovation and customer service. Now in our second hundred years of business, we're continuing that frontier tradition.

Our walk-in coolers and freezers are built to be the best on the market: the most efficient and durable with the lowest level of maintenance. Our legendary service and on-time delivery guarantee your products will stay fresh.

Essential Product Features

-  Foamed-in-place panels with 4 inches of CFC-free urethane, providing R-30 insulating value while adding superior structural rigidity
- Designed to preserve constant temperatures of + 25°F to -40°F
- Heavy-duty aluminum diamond tread plate floor is standard
- Shatter-resistant, vapor-proof light provides greater visibility
- Optional heavy-duty kick plate inside and out

Fast, Efficient Assembly

- Modular panels allow you to quickly set up and install the walk-in
- Easy to assemble onsite, or it can be pre-assembled at our factory
- Pre-engineered for exact fit
- Features a unique locking support system to keep all angles plumb and all seams tight

*Top-mounted refrigeration unit
(side and remote units also available)*

The Difference is in the Door

The door is the most critical component in the performance and efficiency of your walk-in. A well-designed, well-built door maintains an airtight seal, resists sagging, and closes completely, every time.

- Exclusive Addison H-Frame™ design and 12-gauge stainless steel door threshold
- 14-gauge steel channels formed in a C-shape and injected with 4 inches of foamed-in-place polyurethane
- Cam-lift hinges, door straps, and closures are the heaviest in the industry to prevent door racking and ensure proper closing
- All door hardware is tapped directly into the 14-gauge steel frame supports to maintain alignment
- Gas-powered hydraulics close the door easily and assure a tight fit

Diamond tread plate floor

Optional heavy-duty kick plate

Customized to Meet Your Specific Needs

- An embossed stainless-steel finish and five other high-grade finishes are standard, including painted galvalume, patterned stainless steel, galvanized white, stucco aluminum, and stucco white aluminum. Fiber cement is also available.
- Consult the factory for custom heights. Standard heights with floor: 6' 8", 7' 5", 8' 8", 9' 8", 10' 8", 12' 8", 15' 8".
- Each refrigeration unit is engineered to match the specific requirements of your freezer or cooler and is sized based on heavy open door use.
- Top-mounted, side-mounted, or remote refrigeration units are available.
- Refrigeration options keep your walk-in at 35°, 0°, or -10°. Lower temperature models are also available.
- Standard door heights: 75", 79", 84", and 96".
- Standard door widths: 24", 26", 30", 34", 42", 48", 54", 60".

Six high-grade finishes available

YEARS

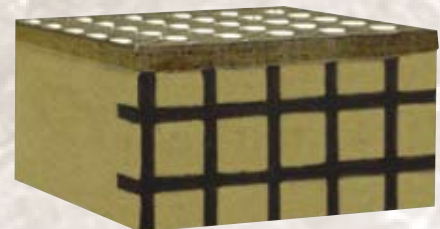

WALK-IN COOLERS AND FREEZERS

The First. The Best.

Additional Options

- High and low temperature alarm system
- Prison package
- Additional vapor-proof or fluorescent lights
- Automatic door closer
- Cylinder or dead bolt lock
- Protector plates and bumper rails
- Three-way light switch
- Ramps for forklifts and hand trucks
- Foot treadle with breaker bar
- Digital thermometer
- And many more

***Industry leading structural floors
for increased load capacity of up to
15,000 lbs. per square foot.***

It's a Fish Story. But It's Entirely True.

100 Years of Quality, Service, and On-Time Delivery

When W. A. Brown built his first refrigerator to keep the merchandise in his fish market fresh, he transformed the future of his company and the refrigeration industry. Since then we've labored to build the best walk-in freezers and coolers on the market. With the forces of innovation and history behind us, we continue to be the first and the best in design, engineering, and customer support.

Each W. A. Brown & Son walk-in cooler or freezer is backed by the industry's most responsive customer service program. It begins before the customer even completes the order, with detailed drawings and customization. It follows with our exclusive No Hassle Freight Damage promise that guarantees you don't miss a day of profit potential. We continue our commitment with the 15-year panel warranty, which assures you of quality, safety, and performance across the life of the walk-in.

Warranty Information and Code Approvals

- All panels carry W. A. Brown's 15-year* warranty.
- Miami-Dade County product control approved (NOA No. 05-1103.01).
- One-year refrigeration warranty on parts and compressor. (Optional warranties are available, call for details.)
- Door hardware is guaranteed for one year.

W. A. Brown & Son insulated panels pass some of the most stringent code requirements in the country. And each walk-in meets all Uniform Building Codes and carries the following certifications:
